

Задание 1,2,3

```
import tkinter as tk

window = tk.Tk()
window.title("Моя Визитка")
window.geometry("350x250")

label = tk.Label(
    window,
    text="Никита ",
    font=("Arial", 20)
)
label.pack(pady=50)

label = tk.Label(
    window,
    text="Студент ",
    font=("Arial", 20)
)
label.pack(pady=50)

label = tk.Label(
    window,
    text="Москва ",
    font=("Arial", 20)
)
label.pack(pady=50)

window.mainloop()
```

```
import tkinter as tk

count = 0

def click():
    global count
    count += 1
    label.config(text=count)

def reset():
    global count
    count = 0
```

```

        label.config(text=count)

window = tk.Tk()
window.title("Счетчик кликов")
window.geometry("300x250")

label = tk.Label(
    window,
    text="0",
    font=("Arial", 20)
)
label.pack(pady=50)

button = tk.Button(
    window,
    text="Кликай!",
    command=click,
    font=("Arial", 12)
)
button.pack()

button = tk.Button(
    window,
    text="Сброс!",
    command=reset,
    font=("Arial", 12)
)
button.pack()

window.mainloop()

```

Простите не доделал

```

import tkinter as tk

window = tk.Tk()

window.title("Калькулятор")
window.geometry("300x250")

def calculate(operation):
